

DWEEPAN GAIN

dweepangain11dec99@gmail.com | +91 8485841623 | Vasco Da Gama, Goa

PROFESSIONAL SUMMARY

Results-driven Computer Science engineer with hands-on experience in full-stack development, machine learning, and AI systems. Skilled in LLM integration, agentic AI, prompt engineering, and NLP-powered applications. Proven ability to build end-to-end web applications, recommendation systems, and AI workflow automation tools using React, FastAPI, Python, and LangChain.

WORK EXPERIENCE

Artificial Intelligence & Machine Learning (AI/ML) Intern | Labmentix Pvt. Ltd. — Virtual | *Oct 2025 – Apr 2026*

- Worked on AI/ML research and development projects involving model training, evaluation, and deployment.
- Applied supervised and unsupervised learning techniques to real-world datasets and contributed to production-grade AI pipelines.
- Collaborated with cross-functional teams to integrate machine learning models into scalable software systems.

Full Stack Developer (In-Plant Training) | Demerg Systems India — Virtual | *Jul 2025 – Sep 2025*

- Completed 8-week in-plant training in full-stack development with a focus on professional software standards.
- Adhered to industry-standard development practices and successfully delivered all assigned tasks.

Machine Learning Intern | JYESTA Corporate Entity — Virtual | *Jul 2025 – Sep 2025*

- Completed certified training covering supervised and unsupervised learning, data preprocessing, regression, and classification.
- Applied ML algorithms in Python to analyze real-world datasets and build predictive models.
- Evaluated model performance using standard metrics and optimized for accuracy.

Frontend Developer Intern | Tenttwenty Digital LLP — Goa | *Aug 2022 – Oct 2022*

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Collaborated within a professional software development environment, demonstrating commitment and rapid learning.
- Recognized by management for potential and creative problem-solving in frontend development.

PROJECTS

AI CRM + PIM Platform | FastAPI, React, Vite, Python, NLP, AI Agent, WooCommerce | *2025 – 2026*

- Built a full-stack CRM + PIM system featuring customer management, order tracking, AI-driven insights, and decision suggestions.
- Developed PIM module with product creation, update, semantic search, and AI-powered product onboarding agent workflow.
- Integrated an AI assistant chat interface and optional WooCommerce sync with a deterministic demo mock fallback.

AI Email Assistant | Python, NLP, FastAPI, React, LangChain, LLM Integration | *Jan 2025 – Mar 2025*

- Built an intelligent email assistant powered by AI to help draft, analyze, and manage professional emails efficiently.
- Implemented advanced NLP and LLM integration to generate context-aware email responses and maintain professional communication standards.

AI-Powered Resume Analyzer | FastAPI, React, Python, NLP, scikit-learn, JWT | *Jul 2025 – Sep 2025*

- Built a full-stack web app that evaluates resumes against job descriptions using NLP, keyword extraction, and skill gap analysis.
- Implemented JWT authentication, PDF export, and a monitoring dashboard. Integrated CI/CD pipeline.

Fraud Detection System | Python, ML, Deep Learning (CNN, RNN, Transformers) | *Apr 2025 – Jun 2025*

- Researched and implemented fraud detection techniques including rule-based, anomaly detection, supervised/unsupervised ML, and deep learning.
- Studied explainable AI (XAI) for model transparency; analyzed cybersecurity threats including phishing, malware, and domain spoofing.

Medical Report Analyzer | ML, NLP, OCR (Tesseract), FastAPI, JWT | *Jan 2025 – Mar 2025*

- Developed an intelligent system extracting structured data from PDFs, images, and DOCX files using OCR and automated parsing.
- Predicted diseases with confidence scores, mapped ICD-10 codes, and generated personalized health recommendations.
- Implemented HIPAA-compliant security: JWT auth, AES encryption, DDoS protection, and audit logging.

Secure Chat Application | Socket.io, JWT, bcrypt, AES+RSA, Docker, Prometheus | *Jan 2025 – Mar 2025*

- Built an end-to-end encrypted messaging platform with real-time chat, voice messaging, and cloud storage.
- Implemented hybrid encryption (AES + RSA), digital signatures, and an admin dashboard. Deployed via Docker Compose.

Social Media Monitoring Tool | Python, NLP, Data Visualization, APIs | *Oct 2024 – Dec 2024*

- Designed a real-time pipeline for scraping social media content, applying sentiment analysis, and generating brand insight dashboards.
- Automated reporting with keyword tracking and engagement metrics visualization.

EDUCATION

Bachelor of Engineering — Computer Science — Agnel Institute of Technology and Design | *2023 – 2026*

Diploma — Computer Science & Engineering — Government Polytechnic, Panaji | *2021 – 2024* Percentage: 67.75%

Secondary (X) — CBSE — Kendriya Vidyalaya No. 1, Vasco Da Gama, Goa | *2017* Percentage: 76.00%

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++, PHP, R, Rust, Kotlin

AI & LLM: LangChain, LLM Integration, Prompt Engineering, Agentic AI, AI Workflow Automation, Hugging Face, NLP

Machine Learning: scikit-learn, TensorFlow, Clustering, Classification, Regression, Deep Learning (RNN, LSTM), Recommendation Systems (Collaborative Filtering), Model Evaluation & Hyperparameter Tuning

Data Science: Data Cleaning & Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA), Data Visualization, SQL & Data Manipulation, Business Insight Generation, NumPy, Pandas, OpenCV

Frontend: React, HTML, CSS, Bootstrap, Vite, Tailwind CSS, Streamlit App Development

Backend & Frameworks: FastAPI, Laravel, Node.js, Socket.io, API Integration, JSON Data Processing

Cloud & DevOps: Microsoft Azure, Firebase, Docker, Prometheus, CI/CD, Software Engineering Best Practices

Databases & Tools: MySQL (phpMyAdmin), Snowflake, Git, JWT, bcrypt

Domain Knowledge: Travel Tech Solutions, Cybersecurity, FinTech, Healthcare AI

Hardware: Arduino, Raspberry Pi, Computer Networking
